- Set of 30 mm rings
- Limited Lifetime Warranty

The Sightmark[®] 8.5-25x50 Triple Duty riflescope uses cutting edge glass with fully multicoated optics, increasing clarity and making it one of the best riflescopes on the market. The fully multicoated optics transmits a bright and crisp picture that makes tracking and shooting targets quick and easy. The 8.5-25x50 features a one-piece 30mm tube that increases light transmission and the field of view. O-ring sealed and nitrogen purged, the 8.5-25x50 is both water and fog proof. This precision scope features a parallax adjustment knob and oversized, locking windage and elevation turrets with 1/8" MOA clicks, making difficult long range shots more accurate. The 8.5-25x50 also features an illuminated red / green Mil-dot reticle to assist shooters in low light situations. The Triple Duty series of riflescopes are complimentary to any shooter's arsenal.
