LANDMARK FULL-SIZE HEAVY DUTY TRIPOD

The Landmark Outdoors Full-Size Heavy Duty Tripod makes it easy to take your outdoor experience to the next level! Quickly mount any 1/4" thread-compatible binocular, spotting scope or standard or digital camera to the tripod's quick-release mounting plate and effortlessly snap onto the 360° rotating ball head. With a maximum weight capacity of 25 lbs, this durably constructed tripod is able to accommodate even the larger and weightier spotting scopes and telescopes. Adjust the tripod's height by simply releasing the locking clamps located on each leg and locking them back into place at the desired height, up to an incredible 54.5 inches. An additional built-in bubble level, located on top of one of the tripod legs for an easy access inspection, helps you keep a perfectly horizontal view on uneven surfaces. An additional steel stabilization rod allows for the quick attachment of up to 30 lbs of stabilization weight to keep the tripod firmly in place. This full-size tripod is surprisingly compact and lightweight, making it easily portable from one site to another. Add a professional, stylish matte black finish and Limited Lifetime Warranty, and it's plain to see why the Landmark Outdoors Full-Size Heavy Duty Tripod is the best option in optic accessories!
